## **DETAILED ACTION**

## **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Abstract, line 2, replace "comprises" with -includes-.

## Allowable Subject Matter

Claims 1-14 and 16-19 are allowed.

Claims 1-14 and 16-19 are allowable over the prior art of record, none of the prior art whether together singularly or in combination to teach the claimed combination as recited. The closest references 'Fractured Reservoir Characterization and Performance Forecasting Using Geomechanics and Artificial Intelligence' by Ouenes et al. and 'Improved Fractured Reservoir Characterization Using Neural Networks, Geomechanics and 3-D Seismic' by Zellou et al. do not disclose or suggest the improvement of the instant application comprises the steps of obtaining and combining seismic traces into gathers that reveal acoustic reflectivity as a function of offset, azimuth, and position (AVAZ), measuring reflection anisotropy as a function of position, determining a relationship between reflection anisotropy and fracture intensity measurements of four month cumulative fluid production at specific positions and applying the relationship to reflection anisotropy measurements to create a set of fracture intensity measurements using multiple regression.

Art Unit: 2863

Ouenes et al. and Zellou et al. teach obtaining 3-D seismic travel time and 3-D average amplitude instead of using AVAZ to determining a relationship between reflection anisotropy and fracture intensity measurements at specific positions and applying the relationship to reflection anisotropy measurements to create/map a set of fracture intensity measurements.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

## Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Toan M Le whose telephone number is (571) 272-2276. The examiner can normally be reached on Monday through Friday from 9:00 A.M. to 5:30 P.M..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Barlow can be reached on (571) 272-2269. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
